- WHEN ORDERING PARTS -

Since each component part is indicated by block, definitely specify both the corresponding Fig. No. and part No. within the Fig. when placing an order for it.

I. FEATURES OF THIS MACHINE

- 1. The game packs in excellent features capturing the hearts of players.
- 2. The lever control system is simple to handle.
- 3. At the flick of a dip switch, you can select among extended play, the number of tanks and time of appearance of an additional tank, etc.
- 4. High score for the day is always displayed on the screen.
- 5. Finely designed cabinet and fascinating acoustic effects.

II. HOW TO HANDLE AND MAINTAIN THIS MACHINE

- Since the UNIVERSAL's ZERO HOUR employs a color TV receiving set, be careful not to shake it during transit and when carrying it about.
- Install it at a location which is not exposed to direct sunlight. In order to prevent the inside temperature rising, avoid as much as possible a location near a heater, etc.
- 3. Since the grounding terminal is visible, be sure to connect it to a grounding conductor.
- 4. Insert the power cord into the outlet and turn on the switch.
- 5. Even if the solid-state module seems to be out of order, do not check the circuit by means of a circuit tester, etc., since the internal voltage of the tester, etc. may sometimes break down the IC.
- 6. Make sure the machine is well ventiated. If the temperature of the IC and transistor is lower than 60°C, the function normally and may be considered reliable. If it exceeds 60°C, their performance cannot be guaranteed.
- 7. Make sure that the connector, etc. is not disconnected.
- 8. Whenever connecting the power cord of the solid-state module to, or disconnecting it from, the outlet, be sure to turn the power off.
- Although the products of UNIVERSAL are manufactured with the utmost care, they may
 develop malfunctions when used for long periods. So, be sure to chek this machine daily.

III. HOW TO PLAY

- 1. Spaceship "ZERO" can be manoeuvred in 8 directions by working the lever distroy the meteorites by using the magazine space gun.
- 2. Shooting down a red meteorite awards a double score.
- 3. If you hit the enemy spaceship while dodging the flickering barrier, 3 enemy spaceships will counterattach launching missiles. After destroying all of then, the next barrier is removed and 3 other enemy spaceships will appear. Thus, a total of 9 enemy spaceships appear, attacking one after the another.
- 4. When you have shot down the 9 assaulting spaceships, a launching pad will appear below. So, carefully land your spaceship on the pad by working the lever. When pushing the FIRE button at this time, your spaceship can be raised. If you succeed in landing, you are awarded additional bonus points which are displayed on the screen.
- 5. The number of cleared screens is displayed by green star(s) on the lower right side. From the 10th screen on, the stars redden.

SCORE

| | Meteorite (large) | 5 pts |
|----------------------|--------------------|--------|
| | Meteorite (middle) | 10 ртѕ |
| | Meteorite (small) | 15 pts |
| | Enemy spaceship | 20 pts |
| 'g' . <u>\$</u> . | Enemy missile | З ртѕ |

IV. VARIOUS OPTIONAL SETTINGS

A. POSITIONS OF DIP SWITCHES

2. Setting the required score for an additional SPACESHIP (SW3, 4)

| Score for Extra | SW3 | SW4 |
|-----------------|-----|-----|
| Over 5,000 pts | OFF | OFF |
| Over 8,000 pts | OFF | ON |
| Over 10,000 pts | ON | OFF |
| No extra | ON | ON |

3. Change-over setting of the mode of game (SW5)

| Sytle | SW5 |
|---------|-----|
| Table | OFF |
| Upright | ON |

4. SW6, 7, 8, of SW A is not used.
